STILL MYSTERIOUS.

More Light Needed on Broker Hatch's Death.

Scofield and His Wife Quarrelled on the Fatal Night.

The Story of the Woman's Adventurous Career Induces Coroner Levy to Make a Close Investigation-The Husband Does Not Want to See Her Again, but May Not Sue for Divorce, las He; Hates Unnecessary Fuss-Her Financial Transactions.

The story of the sudden and mysterious death of Broker Nathaniel W. T. Hatch continues to be the sensation of the city to-day. No case for many years has excited such widespread interest.

The house 64 West Twentieth street, where the body lay for hours, unnoticed, was surrounded from early this morning by a crowd that kept three of Capt. Reilly's policemen constantly busy. Curious people got on the elevated railroad platform close by in the hope of getting a glimpse of the yard, the stone pavement of which is still red with the blood of Mrs. Scofield's unfortunate companion.

The house was vacant. The painters and paperhangers seem to have stopped work in-definitely. Mrs. Scofield slept last night at the Hotel Royal, Fortieth street and Sixth avenue, as she could not bear to remain on the scene of the tragedy. Mr. Scofield did not return home after being paroled by the Coroner. He wandered off uptown and it is doubtful if he got any sleep at all.

An Evening World reporter found him at the entrance of Parker's Hotel at 10 o'clock. He looked pale and haggard, and a stubbly beard had risen on his face. Mr. Scofield seemed to be too despondent

to refuse to talk. "Do you know where your wife is?" asked the reporter.

"No. I have not seen her since noon yes terday. I don't want to see her."

"How do you regard your wife's associa-tion with Mr. Hatch?"

"I protested strongly against the man being in my wife's apartments in the middle of the night, but I did not quarrel about it. I was willing to go and leave him there, and I did so." Have you any intention of getting a di-

yorce?"
"I can't tell you. I haven't made up my

"I can't tell you. I haven't made up my mind. I am a man that doesn't want any more fuss or notoriety than I can possibly help."

Mr. Scofield then went downtown, saying he would be at his office in the Boreel Building the rest of the day.

The police are still pursuing their investigation of the circumstances of Mr. Hatch's death

eath.

Detective Hayes said this morning that he
ad testimony showing conclusively that had testimony showing conclusively that Scofield and his wife had an angry quarrel in the hallway of the house while Mr. Hatch was upstairs. Their voices were heard in pas-sionate debate by a neighbor whose name the

detective has.

There is also a strong suspicion with some people that Mr. Scofield waited on the adjoining floor, not submissively, but with the intention of shooting the intruder when he came out. His remark to Policeman Mc.

Cormick that there was a man in his wife's room and that there would be a case for the courts was not exactly the language of a man resigned to his fate.

Coroner Levy has had a report from Capt.
Reilly the purport of which he will not disclose, but it has led him to order his deputy,
Dr. Jenkins, to make an autopsy on the body

this atternoon.

The Coroner is having the Scofields kept under surveillance, and he will make a searching investigation.

"It is not at all clear to me that Mr. Hatch's death is accidental," said the Coroner to-day, "and I may have to hold these people. I shall await the result of the autopsy and begin the inquest to-morrow afternoon. If certain discrepancies in the statement.

topsy and begin the inquest to-morrow afternoon. If certain discrepancies in the statements in the case are not cleared up, I shall
have to hold the Scofield's for trial."

The body of the unfortunate broker lies at
his late residence, 36 West Fifty-third street.
Whe funeral is announced for 2 o'clock tomorrow afternoon from the house.

Mrs. Lillian E. Scofield's career appears to
have been a dashing and adventurous one,
and it seems that Mr. Hatch was not the first
wealthy and susceptible man of family with
whom she had business relations.

Mrs. Sophronia Twitchell, the advocate of
woman's righta, told Coroner Levy to-day
that she knew of Mrs. Scofield in San Francisco ten years ago. Mrs. Scofield was then
known as Mrs. Stowell. While there she got
into trouble with a rich man who visited at
her house.

Mrs. Scoffeld came to this country from England when she was a young girl. She took to the stage, and before her twentieth year owned a small theatre in San Francisco and starred in a burlesque entitled "Jack and Gill."

After that she travelled through the country with a stock company, and in 1879 turned up in New York with nearly \$80,000.

With this she speculated in stocks and went into various money-making schemes, some of which were profitable. One of her failures was the "Passion Play," which she induced Salmi Morse to put upon the stage of the Twenty-third Street Tabernacle, and for which she provided part of the money. In that unsuccessful venture she was known as "Mr. Johnson."

George D. Roberts. of the Postal Telegraph Company; Albert J. Eaves, the costumer, and D. C. Ferris, whom Mrs. Scofield calls her brother-in-law, also contributed to

tumer, and D. C. Ferris, whom Mrs. Scofield calls her brother-in-law, also contributed to the expenses of the 'Passion Play 'and they bore the greater portion of the loss.

It is said that Mr. Ferris is not related to Mrs. Scofield. He has, however, been acquainted with her for many years, both in New York and the West.

At one nount in her career out West Mrs. Scofield appeared as the wife of a steamship captain whose vessel ran out of San Francisco. The captain died and the mate was lost overboard, and Mrs. Scofield, or Libbie Stowell, as she was then called, navigated the ship to port. In recognition of her pluck and ability the Maritime Exchange of San

Francisco presented her with a handsome silver service.

It is seven years since Mrs. Scofield permanently settled in New York, and all that time she has speculated in stocks. When she was married to Scofield in 1884 he was reputed to be a wealthy silver mine owner and railway capitalist, and he thought she was

rallway capitalist, and he thought she was worth ten times the money she really had.

"EVENING WORLDS" AT A PREMIUM.

The story of the death of Broker Hatch printed in the first extra edition of The Evening World yesterday was read by thousands long before any other newspaper published even the "alleged report" that Mr. Hatch was dead. Every copy of the paper that reached Wall street was snapped up.

One of The Evening World's newsboys, a "histler" despite his name of Sloman, went to Wall street with 160 Evening World's newsboys, and when the World's news, and when Sloman, reached the Stock Exchange he was nearly suffocated by the crowd of brokers who surrounded him. Each paper brought five cents, and in a very few minutes Sloman was \$8 richer than when he left The World Building.

An Evening World wagon was sent down with 300 more papers—all that were left of the first edition. The wagon in an instant was surrounded by Well street men, some rushing out on the street without hat or coat. In an incredibly short time the wagon's supply was exhausted.

ANN O'DELIA'S PURGATORY.

She is Likely to Swelter in the Tombs During the Hot Weather.

While practising on Lawyer Luther R. Marsh's credulity, fat and frowsy Ann O'Delia Salomon warned her victim against reading the newspapers under penalty of roasting thirty thousand years under condi-tions which Bob Ingersoll does not believe

in.

The spook queen is now likely to be treated to an experience which will approach, in a degree, the roasting she prophesied for Mr. Marsh.

Ann O'Delia has been reproduced in wax by a Bowery museum manager, and a lurid regulation fat-lady canvas bearing a new legend announces the fact that the curious may see it by investing a dime.

It was at 3.27 in the morning. The garden was nearly empty of spectators, but the scattering few devotees applauded as lustily as their drowsy condition would permit.

When Herty returned to the track after two hours' sleep, he found that Littlewood had regained five miles of his lead, while he was not so limber as he might be.

Cartwright, the Londoner, had dropped to seventh place. He said that he was "bloody bad" and was "going to drop the blooming, busted race," which he did at 3.50 o'clock, announcing when he lopped down upon his cot that "no blooming think on earth" could move him for a week.

Hughes had been off the track twenty-four minutes while this was going on, taking nouriahment and having a rubbing down.

Littlewood running nicely to the music of

Peter Golden breakfasted between 6 and 7, and while he was picking the bones out of his fish Noremac and Guerrero put their pegs in ahead of his, and at 7 o'clock he had been

relegated to sixth place.
At 7 o'cleck, the fifty-fifth hour of the race, Albert scored in the last race 262 miles, 6 laps, and the record made by Rowell in 1882 was twenty miles better still. Littlewood to day scored 256 miles at that hour, and had covered 945 miles in the twenty-four hours ending then. But Littlewood was in fine condition and is a faster man than Albert,

everything else being equal.

At midnight on the third day of his race
Rowell had covered 3535 miles, and Albert
scored 345 miles at the seventy-second hour, There is little hope that Littlewood can equal this, but it should be borne in mind that Fitzgerald's record was not as good as either of these until the fifth day. He first touched the record at the 110th hour. Jimmy Albert did not touch the record until the seventy-

ninth hour.

Saunders sent word at 9 o'clock that he would not return. Careful scrutiny of Lepper Hughes as he labored around the cllipse discovered that he was breathing heavily early in the day and that he favored his game leg in running. Experts shook their heads and said that if Hughes's trainers permitted him to go to sleep they would never be able to arouse him sleep they would never be able to arouse him

man. He is working to a schedule of five and a half miles an hour, and nothing tempts him to increase that speed. When Hughes, Littlewood and Guerrero have broken themselves all up by spurting, Herty, still far behind, will be in good shape and continue on his schedule to the finish. The advance of Herty to the front may not come in twenty-four hours, but it will surely come, say the knowing ones.

say the knowing ones.

In view of this expert testimony, it may be interesting to review Herty's work. He covered 123 miles 4 laps in the first twenty-four hours and 101 miles 5 laps in the second wenty-four hours. From midnight to 1 o'clock this morning he went 29 miles 1 laps. He had had six hours' deep in two naps, and had, of course, spent some time in his hut for rubbing and in eating. His condition was excellent this morning. He travelled in the same manner in the February race, going 582 miles and receiving second money.

In the fifty-ninth hour Littlewood ran in splendid style. He gained in his lead over Hughes a mile and five laps, making his lead at 11 o'clock nine miles. But he was still six miles slower than Albert at the same hour.

Herty gained a mile and a half on Hughes, but lost two laps to Littlewood.

A man fell in a whiskey fit in the centre of the big pavilion at eleven o'clock, the third case of the kind during the race.

At the sixtieth hour (noon) on Wednesday Albert had scored 288 miles 6 laps in the February race; Herty covered 273 miles 3 laps, and Guerrero 278 miles 1 lap.

Thus Littlewood was behind Albert's record to-day seven miles. Herty's score was not so good as that made by him against Albert by five miles.

The record for the sixtieth hour was made by Charlie Rowell in 1882. He scored 307 miles six laps, and afterwards won the race in 602 miles.

which makes him an easy victim, Littlewood is devoting himself entirely to Dan Herty today. But Herty is not to be induced to forsake his schedule gait.

At noon Littlewood lifted his feet as clean and gracefully as Herty.

The fight is a fine one. Hughes went to his hut for a rubbing at 1.15. and remained

half an hour. Meantime Herty cut out two miles of the distance between himself and the Lepper. Hughes limped badly, but he is made of pure grit, and may yet be a hard man to beat.

RACING IN ENGLAND. The Famous Chester Cup Won by Mr. J. G. R. Homfray's Aged Horse Kipsky. [SPECIAL TO THE PRESS NEWS ASSOCIATION.]

LONDON, May 9. - The sixty-fifth race for

the Chester Cup of £700, for three-year-olds and upward at about two miles and a quarter, was run to-day. It is a handicap at £25 each, £15 forfeit, the second to receive £100 and the third £50 out of the stakes. It had twelve starters and was won by the top weight, Mr. J. G. R. Hoofray's aged horse Kinsky, by Kisber out of Illuminata, carrying 124 lb., with the Duke of Westminsters four year-old Savill, by Hampton, at 108 lb., second, and Lord Bradford's four year-old Chippeway, by Wenlock or Chippendale, at #9 pounds, third. Kinksy's success was somewhat a surprise, for the distance was supposed to be a little beyond his and upward at about two miles and a quarter, success was somewant a surprise, for the distance was supposed to be a little beyond his ability to carry so much weight, his successes during the last two years having been confined to races of a mile and a quarter or under. In 1886 he won the Esher Stakes, at a mile, at Sandown, the Royal Stakes at Epsom at three-quarters of a mile, the Ascot High-weight Handicap, at a mile and a quarter, and the Prince of Wales Cup at Kempton Park in July, while last year he won the Leicestershire Spring Handicap at a mile, the Great Cheshire Handicap at a mile and a quarter, and the Leicestershire Jubilee Handicap at a mile.

The Duke of Westminster, the owner of the second, is one of the principal supporters of the races at Chester, he having contributed 4200 of the 4700 added to the stakes, Eaton Hall, the Duke's Cheshire residence, being one of the show places in the west of England.

"Yes, if it is not too much trouble," was the reply.

"It is no trouble at all, as it is a matter of business," said Airs. Winklemann as she left the room, bearing the first infant with her. A few minutes later the two-weeks-old child was submitted for inspection, a pretty infant, with light blue eyes and blonde hair, which like the other one, was pronounced sound and healthy.

"Do you have many calls for children from poor people?" asked the reporter.

"Well, not exactly poor people, but those of the middling class, and I also make it a point to be assured that the child that leaves my hands shall be properly provided for, and the respectability of the adopters is just as much of a question with me as the parents of the child.

German, whose neat appearance corresponded with the room. After a preliminary conversation, the reporter informed her that a male infant was desired to replace one just lost, and Mrs. Winklemann shortly after presented a babe for inspection.

"This little fellow is five weeks old," she explained, "and a strong, healthy child, too, He is suffering with a fearful cold in his head just now and it makes him sniffle. Otherwise there is nothing the matter with him."

The poor infant was indeed suffering, as his swellen eyes and whe zing proclaimed. His eyes were dark blue. He had brown hair and was not a particularly beautiful child owing to the almost total absence of chin.

"What about his parents; are they respectable?" inquired the reporter.

Mrs. Winklemann straightened up and replied, freezingly:

"Every child that comes into my possession I must have assured proof of its respectability. I make inquiries regarding them, and if they are not satisfactory I refuse to accept them."

"How much do you charge for these babies?"

"Well, that is optional," was the reply.

"Ten dollars is generally the price paid, although I have sometimes received as high as \$20 for a child, and again as low as \$5. It depends entirely upon the circumstances of the parties making the adoption; wealthy people, of course, generally give more than the poorer class.

"The money which I receive is not to be considered as the price of the child, but merely to pay me for my trouble in keeping the children until they are adopted."

Both the children shown to the reporter were dressed in spotless white clothes and looked as though they received the best of care. It would seem that many of these waifs of humanity have their lot cast in much better lines than many of the natural children of this city, who are born in squalor and misery, to grow up in vice and ignorance, while the former are frequently adopted by people of wealth and every attention paid to their education and welfare.

The conversation with Mrs. Winklemann, as here recorded, is not given in her exact words, owing to her unfamiliarity with the English language.
